OBJECTIVE

A motivated and passionate professional seeking an entry-level role as a Full Stack Java Developer. With a solid foundation in software development life cycles, I am eager to apply my skills in Java, Spring Boot, and front-end technologies to build scalable and efficient web applications. I am committed to continuous learning and ready to contribute to innovative projects that leverage modern development frameworks to deliver high-quality software solutions.

EDUCATION

- MCA (Master of Computer Applications. 2024-Pursuing) | AKS University, Satna, MP
- BSC (Bachelor of Science .2019-2022) | Govt. (Autonomous) P.G. Collage Satna, MP
- 12th Board. (2017-2018) | Saraswati H S School, Nagod, Satna, MP
- 10th Board. (2015-2016) | Saraswati H S School, Nagod, Satna, MP

TECHNICAL SKILLS

Programming Languages	C, C++, Java, Python, JavaScript
Web/Backend	Spring Boot, REST APIs, Microservices, MySQL
Tools	GCP Git, GitHub, Linux, Docker (basics), CI/CD, IntelliJ IDEA, STS
Core CS Concepts	Data Structures and Algorithms, OOP, OS, DBMS, Computer Networks
Soft Skills	System Design, TCP/IP, DBMS
	Problem Solving, Leadership, Team Collaboration, Critical Thinking

WORK EXPERIENCE

Software Engineering Virtual Intern | [JPMORGANCHASE & CO]

Nov 2025 – Nov 2025

Remote

- Completed a practical task simulation involving the lifecycle development of a backend service.
- Real-time Data Processing: Implemented Apache Kafka to facilitate real-time messaging and decouple system components.
- Database Management: Integrated an H2 Database to manage application state and persistence during runtime.
- API Development: Built and tested a robust REST API Controller layer to expose service functionality to client applications.

PROJECTS

Smart Inventory & Billing System | [AKS University, Satna (M.P.)]

July 2025 – Dec 2025

- Developed a full-stack retail management application using Java Spring Boot and MySQL to digitise manual inventory and billing processes.
- Implemented Spring Security to enforce role-based access control (RBAC), securing sensitive administrative features and ensuring data privacy for Admin and Staff users.
- Engineered a dynamic billing module that automates GST calculations, applies discounts, and generates downloadable PDF invoices using the iText library.
- Designed a real-time inventory tracking system with automated low-stock alerts to optimise stock levels and prevent product shortages.
- Built a responsive user interface using Thymeleaf and Bootstrap, following a 3-tier architecture for scalable code maintenance

CERTIFICATE

- [GOER – Game of Enterprise Risk® 2025 (Top 10 Finalist)] Institute of Risk Management – India Affiliate's National Gore.
- [Advanced Program on Amazon Web Services (332 Hours)], Anudip Foundation (Supported by Accenture)
- [Core Java], Naresh I Technology, Hyderabad.
- [Spring Boot], Ashok I Technology, Hyderabad.
